

HIV/AIDS Drugs available through the BC-CfE Drug Treatment Program

The medications listed can be requested by completing and submitting an HIV Drug Treatment Program Prescription Request Form. Requests will be assessed according to established therapeutic guidelines. Clinical justification and/or supportive documentation may be required. Eligible individuals will obtain, at no cost, medications offered by the BC-CfE's Drug Treatment Program.

Antiretroviral Drugs for HIV infection

- Abacavir (generic equivalent of Ziagen®)
- Abacavir-lamivudine (generic equivalent of Kivexa®)
- Atazanavir (generic equivalent of Reyataz®)
- Bictegravir-emtricitabine-tenofovir alafenamide (Biktarvy®)
- § Cabotegravir-rilpivirine (Cabenuva®)
- Darunavir (generic equivalent of Prezista®)
- § Darunavir-cobicistat (Prezcobix®)
- Dolutegravir (Tivicay®)
- § Dolutegravir-abacavir-lamivudine (Triumeq®)
- Dolutegravir-lamivudine (Dovato®)
- § Doravirine (Pifeltro®)
- § Doravirine-lamivudine-tenofovir disoproxil fumarate (Delstrigo®)
- Efavirenz (generic equivalent of Sustiva®)
- Efavirenz-emtricitabine-tenofovir disoproxil fumarate (generic equivalent of Atripla®)
- § Elvitegravir-cobicistat-emtricitabine-tenofovir alafenamide (Genvoya®)
- § Elvitegravir-cobicistat-emtricitabine-tenofovir disoproxil fumarate (Stribild®)
- § Emtricitabine-tenofovir alafenamide (Descovy®)
- Emtricitabine-tenofovir disoproxil fumarate (generic equivalent of Truvada®)
- Etravirine (Intelence®)
- Fosamprenavir (Telzir®)
- Lamivudine (generic equivalent of 3TC®)
- Lamivudine-zidovudine (generic equivalent of Combivir®)
- Lopinavir/ritonavir (Kaletra®)
- § Maraviroc (Celsentri®)
- Nevirapine (generic equivalent of Viramune®)
- § Raltegravir (Isentress®, Isentress® HD)
- Rilpivirine (Edurant®)
- § Rilpivirine-emtricitabine-tenofovir disoproxil fumarate (Complera®)
- Ritonavir (Norvir®)
- Tenofovir disoproxil fumarate (generic equivalent of Viread®)
- § Tipranavir (Aptivus®)
- Zidovudine (generic equivalent of Retrovir®)

Drugs for the Indicator Diseases of AIDS covered by the program

- Atovaquone — One-time treatment for PJP, treatment for unresponsive toxoplasmosis, third-line PJP prophylaxis
- Azithromycin — Prophylaxis for MAC, treatment for unresponsive toxoplasmosis
- Ciprofloxacin — For clarithromycin-resistant Mycobacterium avium infections (MAC)
- Clarithromycin — Mycobacterium avium infections (MAC)
- Ethambutol — Mycobacterium avium infections (MAC)
- Filgrastim - HIV treatment-related - neutropenia
- Ganciclovir, infusion & intravitreal — Cytomegalovirus (CMV) affecting sight or organ system
- Rifabutin — Mycobacterium avium infections (MAC)
- Valganciclovir — Cytomegalovirus (CMV) affecting sight or organ systems

Drugs available through Health Canada's Special Access Program

- Albendazole — Microsporidium
- Foscarnet, infusion — Cytomegalovirus (CMV) affecting sight or organ systems
- Nevirapine liquid (Viramune®) — for children
